FIERO

FIERO

The seat, backrest, and headrest are made of mesh, ensuring breathability and comfort. The chair's frame is made of polished aluminum, providing strength and an aesthetic appearance. The chair has a flexible height-adjustable backrest with vertical force adjustment and fixation. Lumbar Support: Flexible lumbar support provides additional support to the lower back. The headrest is height and angle adjustable, ensuring neck support. The height of the backrest is adjustable in five positions using the up-down step-by-step system. The synchro mechanism allows for adjustment and locking in four positions, with the option to adjust two levels of counterforce intensity. The mechanisms are controlled by cables and are ergonomically positioned on the side of the seat. The seat depth adjustment mechanism allows for a slide range of 0-60 mm. 4D Armrests: The armrests are height-adjustable, with a soft-touch surface, and adjustable in length, width, and rotation up to 270°. The 60 mm diameter casters are universally suitable for all surfaces. CLASS 4 gas lift with increased durability. Polished aluminum base with a diameter of 700 mm. The chair has a weight capacity of up to 150 kg.

RAVE

2200 RAVE P

The chair features a stackable design with a tubular frame consisting of 4 steel legs measuring 30x15, with a thickness of 2.0 mm. The frame is available in black or grey epoxy varnish or chrome-plated, equipped with non-slip glides. It incorporates an innovative, patented lateral plug that facilitates the union between chairs, covers, and closes the holes of the frame's tube, enhancing stability when stacked. Pallet-stacked and wrapped in stretch foil, it comes with a 3-year warranty. Loading capacity 120 kg.

TABLES

AXIS

Height-adjustable table with an electric dual-motor drive, three-stage lifting mechanism, very stable and robust frame, overall table height: 620 – 1270 mm, adjustment speed: 32 mm/s, width span of the base: 1100 – 1600 mm, horizontal leg width 700 mm, T-shaped leg, wide glides with rectification for floor leveling 0-10 mm, control settings: 4 memories + USB charger + anti-collision function, base painted in matte white shade, durable powder coating, tabletop with a thickness of 25 mm and 2 mm ABS edging, TÜV certification, load capacity 80 kg, 48 months warranty. Tabletop white or grey: thickness 25 mm, 2 mm ABS edging.

Dimensions	160x80	140x80
	514 €	483 €

T-shaped legs colors	Tabletop colors
RAL 9016 white	White
RAL 9006 grey	Grey

TAXI

Multifunctional table with a folding mechanism of the tabletop, 4 wheels facilitate handling, 2 pieces with a mechanical brake, horizontally stackable, leg shade RAL 9006, mechanism and beam painted black RAL 9005, base height 71.5 cm (total height with the tabletop 74 cm), the tabletop and base are offered separately.

Tabletops in a single color: thickness 25 mm, 2 mm ABS edging, equipped with M6 captive nuts, the table can be ordered with connectors for easy table-to-table connection in a row or frontally. Preparation for connectors on the boards is not standard. Additional dimensions and finishes of tabletops available on request, 36 months warranty, manufactured in the EU.

Dimensions	160x80	140x80
	416 €	377 €

SILENT LEGS

Height-adjustable table base with electric single-motor drive and a two-stage lifting mechanism. It features a very stable and robust frame with a reinforced crossbar and central fixation to the tabletop. The base height ranges from 710 to 1210 mm, with a total table height from 735 to 1235 mm. The adjustment speed is 25 mm/s. The horizontal leg width is 700 mm. The table has a T-shaped leg with wide glides and rectification for leveling floor irregularities from 0 to 10 mm. The control settings include 4 memory positions and an anti-collision function. It is coated with a durable powder coating available in matte white RAL 9016 or gray RAL 9006. Optional tabletops are available with a thickness of 25 mm, widths ranging from 1000 to 1600 mm, and depths from 500 to 800 mm. The noise level is ≤45 dB. The table is TÜV certified, has a load capacity of 70 kg, and comes with a 48-month warranty.

Black, white & grey

265 €

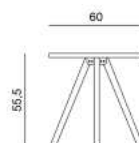

WOOD

Conference table with solid beech base. The design of the base is identical to the conference chairs with Wood base.

Tabletop with a diameter of 60 cm, thickness of 25 mm, ABS edging, in beech decor 381 PR or dark gray - anthracite 164 PE (Kronospan).

The base is lacquered in natural beech. Overall height: 55.5 cm. Transparent gliders suitable for all types of surfaces. Made in the Czech Republic.

MECHANISMS

2685 - SYN K KEY ONE

Synchronous mechanism with automatic adjustment of counterbalance force. During synchronous movement, there is a smooth transition between the seat and backrest angles at a 1:4 ratio. Automatic adjustment of counterbalance force enhances the comfort of dynamic sitting and requires no manual adjustment. Safety function to prevent the backrest from returning (known as anti-shock); the anti-shock system engages the mechanism only after the forces on the backrest are balanced against the applied pressure. 4 locking positions. Seat height adjustment. Tilt lock control – seat angle range is 0° ~ 5.1° and backrest angle is 90° ~ 110°.

2690 - SYN HD Heavy Duty

During synchronous movement, there is a smooth transition between the angle of the seat and the backrest in a 1:10 ratio. The counterbalance force adjustment increases the comfort of dynamic seating and can be performed using a retractable lever, ergonomically positioned for a range of 60 ~ 200 kg. Suitable for intensive operations 24/7 or anywhere a load capacity of up to 200 kg is required. Safety function to prevent the backrest from returning (anti-shock). The anti-shock system activates the mechanism only after balancing the forces on the backrest against the pressing force. 5 locking positions. Seat height adjustment. Tilt lock control - seat angle ranges from 0° ~ 2.0° and backrest angle from 0° ~ 23°. Seat depth adjustment control in the range of 0 ~ 70 mm with 6 locking positions.

2691 - SYN B BALANCE- with negative seat angle regulation.

Synchronous mechanism with balanced forward tilt of the seat and backrest. During synchronous movement, there is a smooth transition between the seat and backrest angles at a 1:5 ratio. Counterbalance force adjustment enhances the comfort of dynamic sitting, with 4 intensity settings. Safety function to prevent the backrest from returning (known as anti-shock); the anti-shock system engages the mechanism only after the forces on the backrest are balanced against the applied pressure. - 5 locking positions. Seat height adjustment. Tilt lock control – seat angle range is 0° ~ 4.0° and backrest angle is 90° ~ 110°; in balanced mode, the range is 0° ~ 6.0° and backrest angle is 90° ~ 118°. Balanced forward tilt of the seat and backrest from 0° ~ -5°, with locking in the basic horizontal position. Seat depth adjustment control with a range of 0 ~ 40 mm and 5 locking positions.

2684 - SYN SL - Self weight adjusting Synchro

Synchronous mechanism with automatic adjustment of counterbalance force. During synchronous movement, there is a smooth transition between the seat and backrest angles at a 1:4 ratio. Automatic adjustment of counterbalance force enhances the comfort of dynamic sitting and requires no manual adjustment. Safety function to prevent the backrest from returning (known as anti-shock); the anti-shock system engages the mechanism only after the forces on the backrest are balanced against the applied pressure. 4 locking positions. Seat height adjustment. Tilt lock control – seat angle range is 0° ~ 5.0° and backrest angle is 90° ~ 110°. Seat depth adjustment control with a range of 0 ~ 58 mm and 5 locking positions.

2678 - SYN ZEPRON

Synchronous mechanism that allows smooth adjustment of the angle between the seat and the backrest. Pressure force adjustment with a wide plastic knob located on the underside of the mechanism. During synchronous movement, there is a smooth change in the angle between the seat and the backrest in a 1:2 ratio. Safety function to prevent the backrest from returning suddenly (known as anti-shock). The anti-shock system activates the mechanism only after balancing the forces on the backrest against the pressure force. 5 locking positions. Seat height adjustment. Tilt lock control - the seat angle ranges from 0° to 10°, and the backrest angle ranges from 90° to 110°.

LAS SYSTEM

LAS - lumbar air support - Lumbar pneumatic air support, regulated by a pump on the lower back side. Only for the collection Gala, Motion and Armin.

MULTI - MULTIBLOCK MECHANISM

The MULTIBLOCK mechanism allows the user to lock the armchair in several positions or to release the lock for 'free float mode'. The MULTIBLOCK mechanism has an extra function to protect the user from impact by the backrest after the shell lock is released and the chair is switched to 'free float'. For models: COSMOS, SHINY, BLITZ, KASE, EWE, ORGA,

TILT - TILTING MECHANISM

The TILT mechanism allows the user to lock the armchair in one position for work and to release the lock for the 'free float'.

MEK- permanent contact

The permanent contact can regulate the angle backrest with the lateral handle and the height backrest with the back handle.

ASYN MECHANISM

Asynchro mechanism - 3 lever asynchro mechanism, seat and back can be regulated separately with 2 different levers. The right lever regulate the angle back. The left lever regulate the angle seat.

GENERAL TERMS & CONDITIONS

Any disputes regarding the conditions outlined in the order confirmation must be reported within 3 days of receipt; otherwise, the confirmation will be considered final.

Antares reserves the right to modify the product for continuous improvement and technical development without prior notice.

The delivery terms specified in the order confirmation are considered confirmed but non-binding. Antares will make every effort to deliver on time in the absence of unforeseen events. However, the customer is not entitled, under any circumstances, to claim damages for late delivery.

Payments must be made according to the agreed terms. Failure to pay may result in Antares charging expenses and applying commercial interest rates.

Goods are shipped at the customer's risk, even if the transaction specifies 'free at destination.' Consequently, it is the customer's responsibility to inspect the package's condition and ensure that the contents match the packing slip. Any visible defects or discrepancies must be reported to the carrier upon unloading and noted on the packing slip. The carrier is responsible for defects or damage.

Complaints about the goods' quality must be submitted to Antares in writing, including the model, defect description, delivery date, and invoice details. Any damage not evident during unloading, but caused during transport, must be reported to Antares in writing. However, a claim cannot be used to justify delaying or suspending payments beyond the agreed deadlines. In the case of a legitimate claim, Antares will only replace defective parts, not the entire product.

The warranty will not cover: incorrect installation, failure to follow Antares' instructions, excessive or inappropriate use of the seats, abuse, or mishandling. Any claims for direct or indirect damages resulting from defective goods are excluded from the warranty. The warranty will be void in case of delayed payments.
