La scocca è caratterizzata dall'impiego di un sistema brevettato di piega dei bordi a tre strati. Questo sistema garantisce alla seduta un'estrema solidità e nel contempo ne accresce le prestazioni in termini di comfort, in quanto permette un adattamento flessibile alle sollecitazioni.

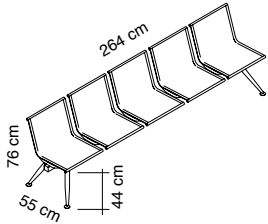

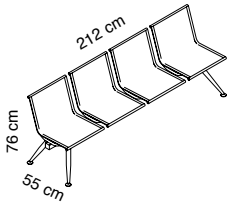

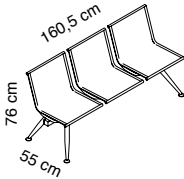

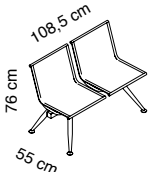

The shell is marked by the use of a patented system with a three-layer fold of the sides. This system makes the seating extremely solid and at the same time increases its comfort, as it allows a flexible adjustment to stress.

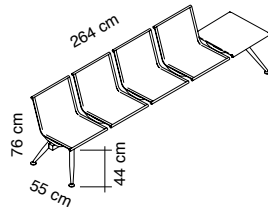

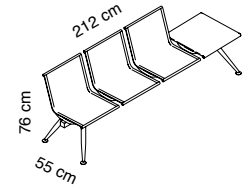

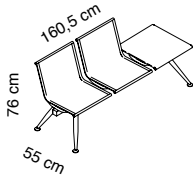

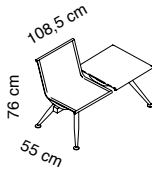

La coque est caractérisée par l'emploi d'un système breveté de pliage des bords à trois couches. Ce système donne à la chaise une extrême solidité et en même temps il augmente sa performance du point de vue du confort, puisque il permet une adaptation flexible aux contraintes.

El cuerpo está caracterizado por el empleo de un sistema patentado doblado en los bordes en tres estratos. Este sistema garantiza una solidez extrema del asiento y al mismo tiempo, aumenta sus prestaciones en lo que es el confort, en tanto que permite una adaptación flexible a las cargas.

Die Sitzschale zeichnet sich durch die Verwendung eines patentierten drei-lagigen Faltsystems der Ränder aus. Dieses System verleiht dem Stuhl hervorragende Festigkeit und gleichzeitig erhöht es auch den Komfort, weil der Sitz Belastungen flexibel standhält.
